MATHEMATICS

READ THESE INSTRUCTIONS CAREFULLY

1. You have been given this question booklet and a separate answer sheet. The question booklet contains 50 questions.

2. Do any necessary rough work in this booklet.

3. When you have chosen your answer, mark it on the ANSWER SHEET, not in this question booklet.

HOW TO USE THE ANSWER SHEET

4. Use only an ordinary pencil.

5. Make sure that you have written on the answer sheet:
   - YOUR INDEX NUMBER
   - YOUR NAME
   - NAME OF YOUR SCHOOL

6. By drawing a dark line inside the correct numbered boxes mark your full index number (i.e. school code number and the three-figure candidate's number) in the grid near the top of the answer sheet.

7. Do not make any mark outside the boxes.

8. Keep the sheet as clean as possible and do not fold it.

9. For each of the questions 1-50 four answers are given. The answers are lettered A, B, C and D. In each case only ONE of the four answers is correct. Choose the correct answer.

Example

14. Which number is divisible by 11?
   A. 40821
   B. 53434
   C. 69725
   D. 31437

   The correct answer is 'A' on the answer sheet:

   14 [A][B][C][D]

   Your dark line MUST be written in the box

   For each question ONLY ONE box is to be marked in each set of four boxes.

   TURN OVER
1. Write seven million sixty three thousand and twenty in figures.
   A. 7063020
   B. 76320
   C. 7630020

    A. 14
    B. 10
    C. 8
    D. 11

11. In the figure below, line AB is parallel to CD.

```
A                          B
                      72°
G                          D
```

   What is the value of the angle marked ‘y’?
   A. 108°
   B. 126°
   C. 54°
   D. 72°

12. What is the next number in the sequence?
   1. 3, 7, 15, 31, ____
    A. 63
    B. 46
    C. 32
    D. 64
13. Find the perimeter of the figure below.

\[(3x + 3) \text{ cm} \]
\[(2x + 4) \text{ cm} \]
\[(4x - 2) \text{ cm} \]

A. 24 cm
B. 18 cm
C. 64 cm
D. 127 cm

14. Wambugu, a std 4 pupil was rolling a wheel of diameter 42 cm. What distance did the wheel cover in 100 revolutions? \((\pi = \frac{22}{7})\)

A. 132 m
B. 66 cm
C. 132 cm
D. 66 m

15. What is the total value of digit 6 in the product of 54.26 and 3.7?

A. 0.006
B. Thousandths
C. Six hundredths
D. 200.06

16. Work out: \(\sqrt{39.1}\)

A. 1.4
B. 2.1
C. 6.1
D. 3.8

17. How many 250 g packets of sugar can be obtained from 2 tonnes of sugar?

A. 8
B. 800
C. 8000
D. 80

Read the following passage carefully and answer questions 26 to 38.

I packed my belongings and sneaked out of the house while my parents were still asleep. I had decided to leave home for good. It had all started when my parents became too strict on me for my liking. It was as if they had declared a ruthless war on me. This was, they said, to straighten me up, whatever that meant. First and foremost, I had been declared the laziest member of my family who could not be relied on to do anything good. To add insult to injury, my father had said that my marks in school were not satisfactory. He had therefore vowed not to buy me the new clothes he had promised to earlier that week.

My siblings had even been instructed not to associate too closely with me, lest they contract my laziness disease. How on earth could I continue living under the same roof with people who had declared total war on me? How could I continue living with siblings who were avoiding me like the plague?

I opened my bedroom door and gave my room one last glance. I let my self out of the room carrying the bag that contained all my earthly belongings. They were a few clothes, a pair of worn out sandals and a battered cap. My pet cat, Loony, could also qualify as my property. However, I did not carry it with me for fear of having an extra mouth to feed.

I stole across the silent compound, opened the gate and started my journey out of my misery. Suddenly, a thought struck me. It sent a chill of trepidation up my spine and made me stop dead in my tracks. I had no idea where I was headed to! As quickly as the realization had come, it vanished from my brain and I proceeded with my journey to the unknown. Nothing would hinder my plans; nothing would break my resolve, I grimly declared to myself.

It was pitch dark. Crickets chirped in the grass and a wolf bayed mournfully, waiting for the sun to rise in the eastern horizon. I walked on and on, without knowing which direction I was headed. I must have walked through the bush for a long time without meeting a soul. Exhaustion must have overcome me and I must have fallen into a deep slumber. I suddenly opened my eyes to see a bee buzzing a few inches from my face. The blinding sunlight made sight impossible. I screwed up my eyes, trying to regain my sense of direction. The area around me was not familiar and I sat up, rubbing my aching eyes. My bag was lying by my side.

Suddenly, I heard a shout.
“There she is!”

“Beware! Catch her! Lynch her!”

I was perplexed. I stared at the group of people who were running towards me. They were armed to the teeth with all sorts of crude weapons. Had they mistaken me for someone else? There was no time for me to ask questions; I was grabbed, gagged and blindfolded. I was then frog-marched away as some of my captors continued shouting in a language I could not understand. Some, however, were speaking in my mother tongue.

“I am surely dead now!” I thought to myself as I sent a prayer to the Almighty to rescue me from the blood-thirsty mob. Was I going to be beaten to a pulp or would they crucify me on a cross like...?

My doomsday thoughts were interrupted by a familiar voice, a voice of somebody very close to me, the voice of my father!

“Hey! What do you think you are doing? That’s my daughter! Leave her alone, you dandyheads!” I heard him yelling frantically. The voice and the words it carried was like sweet music to my ears.

There was a moment of confusion around me before the cloths covering my mouth and eyes were yanked away. I found myself surrounded by my father, my siblings and about a dozen villagers. I ran into my father’s arms, sobbing.

“They had mistaken you for someone else,” my father explained to me, his voice breaking. “I am sorry, my daughter. I have been an irresponsible father. I promise, your mother and I shall be better parents,” he said. Talk of a rescue in the nick of time! What would have happened to me if my family had not organised a search party when they had realised that I had gone missing? I had surely escaped death by a whisker.

Read the following passage carefully and answer questions 29 to 40.

It lies at our feet, stretching in all directions, far and wide. We are standing on a very important natural resource: Soil. Soil is a complex substance consisting of mineral particles, formed slowly over long periods of time and the living things that dwell and work inside it. It is essential to our lives. What role does soil play in our lives? Are there any inhabitants in the soil?

Yes, there are many creatures living in the soil. There is a whole underground world of living things, active and lively, doing their work, spending their lives in soil. Some are very tiny, like the microscopic algae which feed and grow, and produce oxygen for the other organisms. Bacteria also live there, carrying out a host of useful tasks, working on the decay of plant and animal material and releasing nutrients into the soil. Other useful bacteria remove nitrogen from the air and change it into a form that plants can use. There are also fungi, working to cause decay and releasing nourishment into the soil.

In the soil there are also armies of insects which work in countless amazing ways. These insects break down material from plants and animals by chewing with jaws and mandibles. In this way, substances are broken into smaller particles.

In temperate soils, beetles and their young ones break down woody tissues. Earthworms drag leaves into the soil for their food, and some remain in the soil to rot. Their tunnels bring vital supplies of air to the other citizens of the soil.

In tropical countries, termites which can withstand the hot and dry conditions by living in their sandy tunnels and mounds, play an important role in the soil. They work as decomposers, breaking down the hard fibrous material of wood. Millipedes also help in the formation of tropical soils. They consume vast amounts of vegetation, which as it passes through their body, is broken down into smaller particles. This process is useful for improvement of soil fertility.

Larger animals also play their part. Rats, mice, moles and shrews dig burrows into the soil. These allow air to pass into the soil for other creatures to use. Their droppings fertilise and nourish the soil. Soil is a most valuable resource. Tragically, it is being lost worldwide by bad agricultural practices and/or through other harmful means.

Man removes the vital plant cover, exposing the fragile soil structure to the erosive action of wind and rain, so that topsoil is lost forever. The useful organisms in the soil which help to maintain fertility and to recycle nutrients are exposed to the scorching and dehydrating rays of the sun. So they die and no longer offer their valuable service on soil.

Soil is being lost on a huge scale. Deserts are spreading. The available soil for agriculture is being reduced. Famine threatens more of the earth's people every year. How can this be stopped?
It is important to draw the attention of mankind to the disaster that is being enacted around our environment. Man is destroying soil which is the basis of his survival. Thus man must be told how best to conserve soil and how to prevent further loss of this resource that sustains all life.

39. The soil lying at our feet:-
   A. stretches both ways in Kenya
   B. extends in all directions
   C. stretches far and wide in Africa only
   D. is a less important natural resource.

40. How long does it take for soil to be formed?
   A. Over several years.
