"Hurry up and fetch water," Aunt Nyakiega shouted at Nyakio. "You are turning into a little spoiled girl. Do you think I feed you to just sit here and do nothing?" "I am sorry Aunt Nyakiega. I was just finishing up doing the dishes," Nyakio replied. "And who do you think will wash the house and do the laundry? At the slow pace you are moving, nothing will get done on time today. Hurry up, you lazy good for nothing girl!"

Nyakio grabbed the water container and off she went to the community borehole to fetch water. On the way she broke down and cried. Lately her aunt had become very harsh and often beat her in front of her cousins. Her cousins Gatu and Nyiha went to a private school in Nanyuki. Their father, uncle Muriā drove them in his sleek new Mitsubishi Lancer. She longed to go to school but no one had suggested it. Furthermore her aunt kept complaining that she was spending too much money on Nyakio's upkeep.

As she walked to the borehole she thought of her happy days she had spent with her grandmother at Kabati in Miharati. Unfortunately, her grandmother was too weak and poor to raise her. Her mother had left her when she was only three years old and eloped with her husband who she said did not like children. She knew very little about her real father as she was still very young when her mother left. Her mother seldom came to visit her save for those rare times when a close relative died and duty called.

It was only then that she came and bought Nyakio a new dress and a pair of shoes. Unfortunately her mother rarely wanted to talk about anything important with her daughter Nyakio. Several weeks had elapsed but no signs of going to school were evident. When she asked her aunt about it, she was scolded. Slowly, she was turned into a house maid. It was unfortunate that she received nothing for the work she did.

Scientist who study birds have found out that birds can migrate for long distances. Birds have the ability to travel without the use of maps or compasses. It remains a mystery, how this is done. Wagtail, a small grey bird whose underneath is bright yellow hop about on the grass wagging its tail feather up and down appear in Africa in the season between November and March each year. They live and breed in Europe during summer. The arrival of winter they fly south for thousands of kilometers to evade cold and snow. They enjoy months of warmth in Africa before they get back to their breeding abode.

People are amazed when they learn how animals migrate. One famous migration can be seen every year in the Serengeti National Park. Over twelve monthly hundreds of thousands of wildebeests make a journey right round the park. They usually pass through Kenya's Maasai Mara Game Reserve between July and September. Some migrations cause farmers great damage of crops. For many years Kenya has not suffered from swarms of locusts. But sometimes back they were a great danger to agriculture. If locust invade a farm, they could eat all the farmer's crops and all the leaves of his trees in a single night. Quelea, an African bird who travel in large flocks, is a great threat to farmer's grain. They cause havoc to food as locust and so they are referred to as the locust bird.

Yawapasa wanafunzi wote kuyaweka macho yao na hata masikio yao wazi ili wasome na huku wajipangie maisha ya usoni yanayohusu kazi ambazo huenda zikawaangukia. Mojawapo ya kazi muhimu sana ni ile ya uaskari. Kabla ya kujiunga na kikosi yampasa kila mmoja kukata shauri kama anataka kuwa askari jela, askari kanzu, askari kanga, askari polisi au askari doria.

Kwa jumla, kazi hii ni ngumu sana. Sote tumeshawahi kuwaona askari wamejibanza na viambaza vichochoroni wakivizia wahalifu ambao nao hujiambata na kuta au miti ili wasionekane kwa urahisi. Amwonapo askari akisongea, mwizi huchutama au pengine akalala kifudifudi hadi askari apite. Kila mhalifu yuajua kinagaubaga kwamba, siku za mwizi ni arubaini; Kwa hivyo ujanja wake ni sawa na mbio za sakafuni. Mhalifu anapakamatwa hupelekwa katika kituo cha polisi ambako huhojiwa huku akiteswa mpaka akakiri makosa yake. Kwa bahati mbaya zaidi asipokiri makosa yake huwa si dawa kwani hupelekwa mahakamani. Hakimu huyasikiliza mashtaka na

ushahidi wa pande zote mbili. Mara nyingi maneño ya mhalifu husakama kooni. Uchunguzi wa askari nao hujulikana mahakamani. Mara kwa mara askari huhojiwa na hakimu. Hayo yatokeapo, mshtakiwa hupata wasaa wa kupumua.

Kila kesi ina tokeo lake. Kupata au kupatwa. Kwa hivyo, baada ya kesi kuamuliwa hutokea miguno upande mmoja na vicheko kutoka upande wa pili.
