For question 16 and 17 choose the correct

Read the passage below and then answer questions 26 to 38.

Linda was only ten but she would already do most of the house hold chores. Although she had two elder brothers her step mother made Linda do all the work while the rest just played outside, sometime she would be sent to the river ate at night to fetch water.

One day as Linda was hurrying to the river, she met an elderly woman, "Who is this little girl walking in the darkness alone?" the elderly woman asked.

Trembling out of fear, Linda replied, "I am on my way to the river. I must fetch some water for my step-mother.

The elderly woman asked Linda to place her jerrican on the ground and she commanded: "The old lady of the river says fill this jerrycan with water." Immediately, Linda's container was full to the brim. She could not believe it. She did not have to walk the long distance to the river in darkness. As Linda made to lift her jerrycan, the elderly woman disappeared mysteriously.

Linda returned home and her step - mother wondered how she had made it to the river so fast. "Nowadays you are working with the pace that I have always wanted," the step - mother said. But Linda did not tell her about the elderly woman who had helped her.

The following morning when the other children were asleep, Linda was told to wake up early to clean the utensils and dust the house. She was instructed to eat her breakfast quickly and proceed to the farm.

Linda picked her small jembe and left the other children playing. When she was about to start tilling the land, the elderly woman appeared again.

"What is this little girl doing?" she asked. Linda replied, "I am tilling the land." The elderly woman asked her to rest under the shade then she commanded the jembe to till the land.

The jembe worked on the <u>portion</u> that Linda had been <u>assigned</u> for the day but when Linda looked up to thank her she had already vanished.

When Linda returned home, her step- mother pinched her ears. "What have you come back home to do. I said you must finish tilling that portion of land," she barked.

Linda was very sad but when her step- mother went to the farm, she could not believe what she saw. You have to tell me who is assisting you to do the work," she said. But Linda was secretive.

Read the passage below and then answer question 39 to 50.

Throughout the ages, human beings have had to suffer tragedies of war and diseases. However, the HIV/ AIDs <u>pandemic</u> appears to be the biggest and the most devastating pandemic of our times. Although the problem is left worldwide, the highest number of people with HIV live in Africa.

The first AIDs case in Kenya was diagnosed at the Kenyatta National Hospital in 1984. Today, we are like a people at war. Hundred are dying of AIDs everyday while many young people are being infected. It is the most terrible tragedy in our history. That is why the state declared the scourge a national disaster. Then, in 1999 the National Aids Control Council (NACC) was set up to fight the scourge.

when NACC was established, one of its objectives was to reduce the prevalence of HIV in the country by 20-30% before the year 2005. Looking back one can say that lots of gains have been achieved in the war against AIDs.

Unfortunately, there are many stumbling blocks in the war. To start with, people living with HIV/AIDs are treated unfairly. They are hated and discriminated against. This is because people associate HIV/AIDs with sexual immorality.

Some people have the mistaken belief that AIDs is only a disease for prostitutes or promisious people. Yet it is known that the virus is transmitted in other non-sexual ways. Many people do not reveal their HIV status because they are afraid of being rejected by their family and community.

to find out their HIV status. Yet with such information they are better placed to live positively with the virus. For example, those with children would be in a position to plan for the future of their children.

As HIV/AIDs pandemic threatens to wipe out our youth we Kenyans must do something. We need to fight this menace by all means. It is a known fact that 9 out of 10 people with HIV got it through sex. So if the main way of transmission is through sex, then why not abstain?

Abstinence never killed anyone
